

**LAZAREX CANCER FOUNDATION EAST BAY GRAND OPENING  
CELEBRATION SET FOR JANUARY 17, 2008**

DANVILLE, CA, January 3, 2008 – Lazarex Cancer Foundation will hold an Open House to celebrate the opening of their new offices at 169 Front Street, Suite 203, Danville.

Lazarex Cancer Foundation is a volunteer-run nonprofit supporting cancer patients who have been failed by conventional medicine by providing financial assistance for, and access to, new and promising treatments. The Open House will take place from 4-7p.m. with refreshments and special guests, including the daughters of a Lazarex Cancer Foundation patient named Florence, who is currently being treated in Santa Monica with Regin-G for breast cancer under the care of Dr. Sant Chawla.

“The Open House will provide us with an opportunity to thank our Bay Area supporters, who are helping us change the face of cancer, one life at a time.” says Dana Dornsife, Lazarex Cancer Foundation president. “We are also reaching out to community members who may be interested in learning more about Lazarex Cancer Foundation.”

Lazarex Cancer Foundation provides access to revolutionary treatments, such as Regin-G™, the first treatment the Foundation has endorsed. When given by intravenous infusions, Regin-G™ has been shown to stop cancer growth with shrinkage and death of the cancer cells of solid tumors in humans – determined by CT scan and MRI – without eliciting the debilitating side effects that often accompany treatments such as chemotherapy. Regin-G™ is approved in the Philippines for all solid mass tumors and in Phase 1/2 trials here in the United States for sarcoma, pancreatic and breast cancers.

Lazarex Cancer Foundation has had stunning success in giving scores of patients a much higher quality of life. Florence’s story shows how Lazarex Cancer Foundation is actually treating patients today, not just searching for tomorrow’s cure.
